

G-DemMAIN Setup V1.4

*The listed items may be non-exhaustive, only relevant items are listed here.

**To be confirmed.

***Technically after After=network.target and has no requirement.

****If the service restarts, then RestartSec=10.

****The web user & database is used to store website specific data, e.g. dashboard accounts details, dashboard audit logs, etc. This user has read access to all tables in this database, however write access to only certain tables (e.g. it can write audit logs, but not change account details).
